

Cai Yun ® WF

Anti-migration Cream

Application

1. Mix 30-50% WF Anti-migration Cream and 50-70% clear paste, blend thoroughly to make the anti-migration paste. Higher composition of the cream will result in better anti-migration capability.
2. It is highly recommended to use the clear underbase paste for the fabric to mix with the anti-migration cream, so that the anti-migration layer will not be washed off from the bottom layer.
3. The anti-migration paste should be printed 2-3 times to achieve the expected performance.
4. Customer can add white paste when making the anti-migration paste according to specific needs. In this way, it can enhance the overall white coverage.

Storage

Keep container tightly closed and in a well-ventilated place. Most suitable storage temperature is 5~35°C. Keep away from heat, steam pipe or sunlight.
